All heads have had the following remanufacturing operations completed:

- Completely disassembled, thoroughly cleaned in our hot acid jetwash
- Cooling system pressure tested
- Valve guides, seats, valves, springs, retainers, and keepers inspected and replaced as necessary
- All exhaust valves replaced
- Resurface the fire deck
- Multi angle performance valve job with 3 angles
- Set spring pressure, spring height, stem height, and valve recession
- New Viton® valve stem seals installed and assemble head

O-ring option, helps prevent head gasket failures:

- O-Ring grooves machined into deck and wire installed

Porting option:

- Multi angle performance valve job with 5-7 angles and radius cut for improved flow
- Porting concentrating on the bowl and seat area of the ports yielding significant gains
- Exhaust ports matched to gaskets
- Intake airflow improvements typically gains 17-60+% below .500" lift
- Exhaust airflow improvements typically gains 18-30% below .500" lift
- Modified to work well with factory and performance cams
- Lowers EGTs, Lowers required boost; Increases Efficiency and Power
